

# BILAL TARIQ

## Biotechnologist

A recent graduate in Biotechnology, I am a goal-oriented individual dedicated in carrying out many research projects pertaining to my field, such that it allows me to expand my knowledge as well as may assist in advancing science further.

## OBJECTIVE

To apply theoretical studies taken into practical work, in addition to gaining experience to further increase my knowledge and understanding of basic concept. Thereby, enhancing my professional skills under the supervision of highly efficient seniors. Consequently, carving a successful career as a scientist.

## ACCOMPLISHMENTS

### Completed Research Paper

University of Lahore, 2017-2018

Cloning of peroxidase gene of Mtb.

The project consisted of both molecular and microbial techniques.

Molecular Techniques :

- Polymerase Chain Reaction (PCR)

- Gel Electrophoresis

- Competent Cell Preparation

Microbial Techniques :

- Media pouring

- Spreading microbe on plate

- Working in a safety cabinet

## ACADEMIC BACKGROUND

### The University of Lahore

Bachelor of Science (BS HONS) in Biotechnology, 2014-2018

CGPA of 3.12

### Forman Christian College

FSC in pre-medical, 2014

Grade C

### Unique Group of Institutes

Matric, 2012

Grade A

## SKILLS & INTERESTS

- Proficient handling of lab apparatus
- Skillfully identifying microorganisms through microscopic examination
- Excellent communication skills
- Great teamwork

- Learning new artifacts
- Attending various seminars and workshops related to my field
- Great interest in teaching
- Sports (Cricket and Football)
